C++

C

Java

Akka

Photoshop

## PERSONAL PROJECTS

### Catan Board In React From Scratch [🔗](#)

- Made all the design with pure CSS code for learning.
- The board is responsive and clickable.
- Easy to use dice rolling option with a designated "roll a dice" popup button.

### Portfolio Website In React From Scratch [🔗](#)

- The template of the code made by me.
- The code is modular, readable, flexible and easy to change.
- All the components made by me for learning.
- The website is compatible for mobile.

### Fullstack Restaurant Platform In React-Redux [🔗](#)

- This project is MERN Fullstack - MongoDB, Express React & NodeJS
- There is a registration of users with username, password, location, and a photo.
- Each user can modify its own profile and look for other profiles.
- Each user can open a restaurant, look for restaurants, and review them.
- The design in the website is by bootstrap.

Notice: there's a link in the title for each project
